*Notice: The open house will NOT be recorded. No formal presentation has been prepared or presented.*

*Open from 6 till 9 p.m.*

*May 4<sup>th</sup>, 2023*

# Vision Principles

VI

Woodland is a small, relatively affordable, full-service community enhanced by proximity to regional outdoor and metropolitan resources.

Woodland is a  
small, relatively  
"conservative"  
full service  
community...

Affordable is  
relative - depend-  
ing on how  
many rate in-  
creases we  
face between now  
& then.

"IS" If this is  
visionary this  
should be future  
time.

Don't use  
"relatively"  
observable  
to be better idea  
regarding home-  
owner-based  
community

and business -  
brimly, and  
promoting of  
increases in  
manufacturing  
& other industries  
w/ family wage jobs.

Regional  
outdoor  
activities/  
recreational  
opportunities

# Vision Principles

## V2

The city will maintain small-town community identity based around livable neighborhoods and quality schools while accommodating moderate growth.

Need a better word  
than livable...  
Homeless camps are  
livable for some people

"livable" =  
w/ yards or not all  
crammed together  
moderate → slow  
thoughtful growth  
Planning  
Quality schools  
w/ top academic  
standards

# Vision Principles

V3

The city will prioritize future expansion of industrial and commercial economic opportunities to attract family-wage jobs in the community and commercial services for residents.

Variety of  
industrial, i.e.

manufacturing  
light to heavy  
industry

(stable) long-  
term family wage  
employment

can downtown  
self-employment

professional  
businesses be

included & within  
other areas including  
home-based businesses

Will not only  
prioritize but

promote &

support w/

support for

start-ups through

long-term businesses

# Vision Principles

V4

The city will expand infrastructure to serve planned development and will maintain adequate levels of service to support the current and future community.

Sounds good, just didn't happen since

2016:

Roads in bad shape

leaking water tower

wasted processed water

Utilities allowed to get

in bad shape requiring

Big rate hikes,

The city will ensure the infrastructure accommodates the needs of the community.

city will expand infrastructure to the degree it takes needed to stay at optimum level to meet & exceeds needed services as community & business opportunities grow.

# Vision Principles

## V5

The city will cultivate environmental assets like Horseshoe Lake and the Lewis River for both recreational use in the form of parks and trails, and environmental protection.

"Cultivate" =  
maintain and out  
Manage the  
local natural outdoor  
attractions such as  
HSL & LR for  
multi-use; and other  
parks & trails  
Don't use "environmental"  
twice
